## Summary

---

Experienced Software Developer with 5+ years of experience designing, developing, and supporting web, desktop, and IoT applications in pharmaceutical and manufacturing environments. Skilled in C#, .NET, Java, React, TypeScript, Node.js, PHP, and AI-assisted development, with experience building REST APIs, full-stack applications, and enterprise integrations. Strong background in troubleshooting, root cause analysis, ERP integrations and developing solutions aligned with Health Canada and FDA requirements. Agile team member focused on delivering reliable, scalable, and maintainable software solutions.

## Skills

---

**Languages:** C#, .Net, Java, React, PHP, Node.js, TypeScript

**Databases:** MySQL, PostgreSQL, MongoDB, SQL Server, SQLite, Redis, DynamoDB, Firebase

**Development Tools:** Git, Docker, Kubernetes, Terraform, AWS, Azure, Google Cloud, Postman, Swagger/OpenAPI, npm, Maven, Gradle, WAMP, XAMPP, Composer, Jira, Confluence, Jenkins, GitHub Actions, MQTT Explorer, Apache, Nginx, Vagrant

**Application Development:** Desktop Applications, Mobile Applications, Web Applications, RESTful APIs, Microservices, Distributed Applications, Cloud-Based Applications, IoT & Embedded Systems, Real-Time Applications

**AI:** Claude, OpenAI, GitHub Copilot, Prompt Engineering, RAG, AI-Assisted Development

**Certifications:** AWS: Developer Associate, Cloud Practitioner | French: TEFAQ B2, TEF Canada B1

## Experience

---

### Software Developer

Montréal · Jun 2021 – Present

*Cryopak Industries Inc.*

- Designed and developed multiple applications, including a Factory Acceptance Test (FAT) application, to streamline and modernize manufacturing workflows.
- Developed workflow solutions to manage the complete SIM-card lifecycle across multiple vendors, supporting LTE-enabled data loggers and improving operational efficiency.
- Built and maintained a tracking web application managing 100,000+ active LTE data loggers used by major pharmaceutical customers.
- Migrated legacy applications to modern stacks, enhancing security, maintainability, and performance.
- Collaborated with Quality teams to create and maintain technical documentation aligned with Health Canada and FDA compliance requirements.

## Projects

---

### Real-Time Collaboration & Document Management System

*C#, ASP.NET Core, React, TypeScript, SignalR, PostgreSQL, Redis, Docker, AWS S3*

- Developed a web based document management platform with real-time collaboration, secure file storage, and role-based access control.
- Built workflows for document management, access control, and team-based collaboration.

## Education

---

### Lasalle College

Montréal · 2020 – 2021

*AEC in Information Technology - Programmer Analyst*

Comprehensive coursework in software development, database design, database management, web and mobile application development, object-oriented programming, systems analysis, networking, software architecture, and information systems implementation, complemented by hands-on development projects and industry best practices.
